

FIREW MULAT

FULL-STACK DEVELOPER

Bahir Dar, Ethiopia, 0924849432 | firewmulat777@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with experience in building web applications by using Next.js, React, TypeScript, NestJS, Prisma, PostgreSQL and MySQL. As a result of the work, I have implemented several websites, one of which is the hotel management and booking system, and the other is the barber booking and queue management system. I have experience with REST API, authentication and authorization mechanisms, role-based access control, booking logic, database design and payment system integration.

TECHNICAL SKILLS

- Next.js → frontend
- NestJS → backend APIs
- Prisma → database access
- PostgreSQL → database
- JWT/RBAC → authentication/authorization
- Chapa → payment

PROJECT EXPERIENCE

Full-Stack Developer | Software Projects

- Collaborated with a small development team on a hotel management and room-booking system, contributing to the full-stack implementation while working within a shared project structure.

- Independently designed and built a barber management, queue, and booking system in approximately two weeks.
- Applied requirements analysis, frontend and backend development, database integration, debugging, API integration, and deployment across practical business applications.

PROJECTS

(1) Hotel Management & Booking System | Full-Stack Developer

Stack: Next.js, NestJS, Prisma, PostgreSQL/Neon, JWT, RBAC, Chapa

- Built an end-to-end hotel management and booking platform with customer/admin authentication, role-based access control, room and room-type management, booking workflows, guest management, notifications, and payment processing.
- Implemented room-availability validation and booking logic to prevent overlapping reservations and maintain consistent booking data.
- Integrated Chapa payment initialization , verification and connected payment status with the booking workflow and But the payment is now on testing mode.
- Designed the frontend, REST APIs, Prisma/PostgreSQL data model, validation, error handling, and deployment configuration.

(2) Barber Management, Queue & Booking System | Full-Stack Developer

Stack: Next.js, NestJS, Prisma, PostgreSQL/Neon

- Independently designed and built a full-stack booking and queue management system for day-to-day barber business operations.
- Implemented customer authentication, appointment scheduling, barber/staff management, services, queue status, booking cancellation, notifications and an administrative dashboard.
- Connected the Next.js frontend with backend REST APIs and PostgreSQL database operations to support booking and queue workflows.
